Fasten projects up to 4X faster!

Introducing an exciting new way to complete your projects. The Simpson Strong-Tie® Project Pro screw driving tool provides a versatile solution that makes fastening faster, safer and easier.

- Auto-feed technology drives screws repeatedly – just point and drive
- Fits most cordless drill/driver motors
- Simple to use – less experienced users can work quickly and efficiently
- No fumbling and dropping screws
- Designed for use with 1½"–2½" WSV and DSV Wood screws collated for Quik Drive systems

Quik Drive Project Pro and collated screws from Simpson Strong-Tie, the leader in structural and project fastening.

Features

Works with most cordless drill or driver motors

Fasten projects up to 4X faster!

Easy to Use

1. Attach Project Pro to drill/driver by inserting hex shaft into chuck, adjusting and tightening arm, and tightening battery strap

2. Insert the collated strip, pointed end first

3. Ensure drill/driver is set to FWD, press trigger and push down to drive screws (countersink depth can be adjusted using the depth-of-drive adjustment dial – see product features image on page 2)

Fasten projects up to 4X faster!

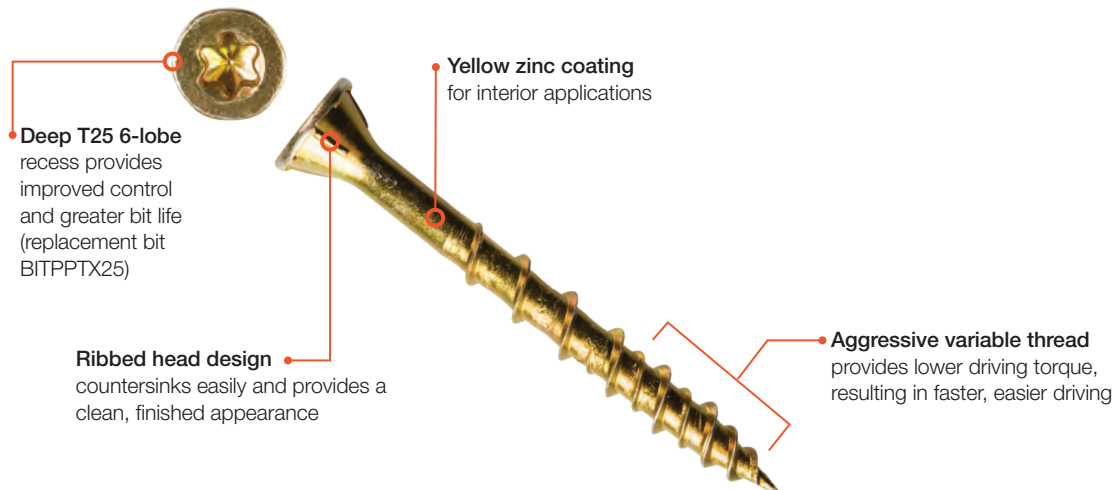

Project Pro is compatible with the following industry-leading Quik Drive® code-listed, premium collated fasteners: Deck-Drive™ DSV Wood screws (for exterior projects) and Strong-Drive® WSV Subfloor screws (for interior projects).

Collated Deck-Drive DSV WOOD Screw

Collated Strong-Drive® WSV Subfloor Screw

Fasten projects up to 4X faster!

Use Project Pro on fences, decks, subfloors, sheathing and more.

Fasten projects up to 4X faster!
